Additional Services for our Students

Honors Program

Is the Honors Program just more work? Not at Southwestern. Our Honors Program offers a stimulatingly different approach to learning. It is not the academic equivalent of boot camp with extra push-ups!

It is designed for well-prepared students who seek a new challenge, relish discussion, and want to engage important ideas. Our courses often transcend disciplinary lines: a mathematician and an historian, for example, might lead out in the examination of a classic religious text. Honors students also have the opportunity for summer study abroad. A recent trip studied the Roman Empire and early Christianity in Italy, visiting sites ranging from Rome to Pompeii. Each honors graduate designs a special research project, completed in the senior year.

The Write Spot

Students with unfinished drafts, writing questions, need for documentation help, and need for motivation to finish those assignments are welcome to take advantage of the writing tutors that are provided to assist them. Schedules are posted at the beginning of each semester. Get that A!

Pathways to Success

We Prepare Young Professionals for Personal, Academic, and Career Success. Each student is given a coach and the opportunity to take our freshman course, Habits for Success. During their time in our First-year Success Program, students learn the habits they need to succeed. Along with their coach, who will provide them the support they need during their first year at SWAU, every first-year student is given a family group, since we are family at Southwestern.
